

## ***HI-6100 Software Upgrade Version 2.7***

### ***Installation Notes:***

Refer to the HI-6100 Field Monitor User Manual for the HI-6100 (ETS-Lindgren Part #H-600099 B).

**Use a standard USB memory stick. Do not use USB U3 smart drives,** these are known to not work properly.

**Unzip** the contents of the internet download to the root folder of the USB drive (for example if your USB stick is seen on your computer as drive E:, then the root folder would be E:\).

The following files should now be on the root folder of your USB drive:

ActXPrb.ocx	4/19/2016
HI-6100.exe	4/20/2016
Setup.exe	4/20/2016
Inst-6100.exe	12/14/2010
GPIB4.dll	10/31/2006

Now follow the steps below,

1. Turn the HI-6100 OFF using the power switch.
2. Insert the USB drive containing the files above.
3. Turn the HI-6100 back ON
4. After the main menu is showing, select the **System** button.
5. Select the **More...** button.
6. Select the **Update Software...** button.
7. Wait a few moments and press the **Proceed with update** button.
8. Wait a few moments for the HI-6100 to reboot itself.
9. After the main menu is showing again, select the **System** button.
10. Then select the **More...** button.
11. **Verify that the Software field is showing Ver:2.6.x**
12. Remove the USB drive.
